SUMMARY

My research advances our knowledge in corporate engagement with open source projects. As corporate involvement increases, open source foundations provide guidance and support for open source projects. We only begin to understand the evolution of this triangular relationship. My current research focus is to inform this relationship through research into open source project health and new market mechanisms. My work has been accepted to the Communications of the Association for Information Systems, the Journal for Universal Computer Science, ACM GROUP, Americas Conference on Information Systems, OpenSym, HICSS, CHAOSSCon, INFORMS, and MWAIS. My research has been supported by the Alfred P. Sloan Foundation, Mozilla, and the Linux Foundation.

I am engaged at both professional and university levels. I volunteered at various academic conferences, was a conference co-organizer for the 2017 Big XII+ MIS Symposium, am currently the Communications Chair for AIS SIGOPEN, and am an active member of the University of Nebraska at Omaha's BRIDGE Lab — a lab dedicated to the advancement of IT design, architecture, and education. I have reviewed for ICIS, AMCIS, MWAIS, ECIS, PACIS, HICSS, and OpenSym. Finally, I am an active member in the Linux Foundation CHAOSS project and the Mozilla Bugmark project.

EDUCATION

University of Nebraska at Omaha, Omaha, Nebraska, USA

- Ph.D. in Information Technology planned 2019
